DETAILED ACTION

- 1. The rejections under 35 U.S.C. 102 given in section 2 of the detailed portion of the office action mailed 04 December 2006 are withdrawn in view of applicant's new claim language as filed 05 March 2007.
- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 2-4 and 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kano et al. (U.S. 4,871,585) in view of Dungan (U.S. 2,328,203).

As a matter of claim construction, the part that is masked in instant claim 2 is taken as being a positive limitation of the claim. The claim is taken as being to a combination of a mask and a part that is masked.

Application/Control Number: 10/510,561 Page 3

Art Unit: 1772

Kano et al. teaches a part with a through hole where the inside of the through hole is masked from penetration by liquid from both sides of the through hole by expansion of a rubber plug inserted into the hole so that both ends are bigger than the circumference of the hole (abstract, Figure 1). Duggan teaches a flexible rubber mask where both ends are larger than the portion of the hole to which it is inserted in order to seal both ends of the hole circumference (elements 28 and 21). instant invention claims a part with a through hole with a plug mask where there is a flange on each end that is larger than the through hole and where the flanges seal the wall of both ends of the through hole. It would have been obvious to one of ordinary skill in the art to have used a mask such as taught by Duggan in the through hole of Kano et al. in order to avoid a swelling step when sealing the wall of the through hole from both sides because of the teaching of enlargements at both ends of a flexible rubber mask by Duggan. No particular weight is given to the method of forming the mask unless it can be shown to cause different final product qualities.

4. Claims 5-7 rejected under 35 U.S.C. 103(a) as being unpatentable over Kano et al. in view of Duggan as applied to

Application/Control Number: 10/510,561

Art Unit: 1772

claims 2-4 and 7-10 above, and further in view of Horiki et al. $(U.S.\ 5,902,642)$.

Horiki et al. teaches multiple insertion members on a single sheet in order to seal multiple holes (Figure 6). The instant invention claims multiple insertion parts on a continuous top flange. It would have been obvious to form multiple insertion members of the combination of Kano et al. in view of Duggan on a singe upper flange in order to allow sealing of multiple holes because of the teachings of Horiki et al.

- 5. Applicant's arguments with respect to claims 2-10 have been considered but are moot in view of the new ground(s) of rejection.
- 6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS**ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37

 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS

Application/Control Number: 10/510,561 Page 5

Art Unit: 1772

of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Watkins III whose telephone number is 571-272-1503. The examiner works an increased flex time schedule, but can normally be reached Monday through Friday, 11:30 A.M. through 8:00 P.M. Eastern Time. The examiner returns all calls within one business day unless an extended absence is noted on his voice mail greeting.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on 571-272-1498. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR of Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
